

Dental Qualification Review

The dental profession continues to evolve with the integration of digital dentistry, enhanced infection control measures and growing expectations for patient-centred care.

The Dental Qualification Review project will assess 5 qualifications and 2 skill sets across dental assisting, technology and prosthetics. It will respond to major sector changes, including the increased use of digital dental technologies, updated infection control and radiation safety standards, and the rising use of telehealth consultation, particularly in rural and remote communities.

Benefits of being involved

Your input is important and will:

- help align qualifications with current legislation and reporting requirements
- ensure the graduates and the current workforce are equipped to perform their roles
- provide insight into workforce training needs and opportunities for improvement.

How to get involved

Please visit humanability.com.au to learn more about the project and register for updates and consultation opportunities.
