

Optical Dispensing Qualification Review Project

We need your focused attention!

Our Optical Dispensing Qualification Review Project will help keep the optometry sector vibrant and relevant to meet Australia's vision and eyecare needs.

It includes a review of the *HLT47815 Certificate IV in Optical Dispensing* qualification against current industry needs, skills and technologies.

The project will update the qualification to ensure it aligns with regulatory requirements, safety and wellbeing outcomes for clients, and to create clear and sustainable career pathways to support existing and future growth in the industry.

A Technical Committee has been established to provide expert advice for this project and a consultation strategy has been prepared to engage a range of stakeholders.

Research and data analysis is currently underway to prepare draft units of competency, qualifications and skill sets for the national stakeholder consultations.

Benefits of being involved

Your involvement in this project is important and will:

- provide insight into current and emerging trends within the sector
- identify training and skills needed to meet industry requirements
- identify career pathways and opportunities within the sector
- help to update the qualification to reflect current and future industry practices.

How to get involved

Please visit humanability.com.au to find out more about the project and to register for project alerts, updates and consultation opportunities.
