

HLT Health Services Assistance Qualification Review Project

Aligning training with contemporary health care practices for direct client care

We're undertaking a review of the [HLT33115 Certificate III in Health Services Assistance](#) qualification to align it with contemporary practises, latest technology, increased emphasis on patient-centred care and preparedness for disease outbreaks.

It will provide an opportunity to ensure training products serve the dynamic nature of the healthcare industry, ongoing efforts to improve patient care and safety, and adapt to evolving healthcare challenges.

More flexible training products are required to respond to common skill requirements across occupations and areas requiring specific expertise.

Benefits of being involved

Your involvement in this project is important and will:

- reflect changes in skill and knowledge requirements
- assist in upgrading the qualification
- help identify common core skills, skill sets, specialisations and a career pathway for workers.

How to get involved

Visit humanability.com.au to find out more about the project and to register for project alerts, updates and consultation opportunities.

Webpage: [Health Services Assistance Qualification Review](#)

There will be a range of activities during the consultation period such as workshops, surveys, interviews, meetings and submissions.
