

SIS Superseded Units Project FAQ

Overview

We are updating the *SIS Sport, Fitness and Recreation Training Package* to address superseded, equivalent units within qualifications and skill sets. This ensures compliance with the *Training Package Organising Framework (TPOF)* while maintaining industry relevance.

This work is currently underway, and a minor release of the *SIS Sport, Fitness, and Recreation Training Package* is scheduled for **January/February 2025**.

The new release will include updates to 13 qualifications and 9 new skill sets. Attachment A provides a full list of the affected training products.

Qualifications/Skill Sets

What does it mean if I have an affected qualification or skill set on my scope?

- Affected qualifications will retain their title and code and receive a new release number.
- Affected skill sets will be superseded, given new codes and retain their current titles.

RTOs will have 12 months to transition to the new released qualifications or the new skill sets. During this transition period, RTOs may continue to deliver the superseded products. This gives RTOs time to prepare and transition. New students can still enrol but must complete or transfer out before the end of the transition period.

SISSS00126 Wilderness First Aid and SISSS00127 Aqua Exercise Instruction

What changes are being made to these skill sets?

- *SISSS00126 Wilderness First Aid skill set*: The unit *SISXEMR002 Manage emergency situations* will be replaced by the non-equivalent unit *SISXEMR004 Coordinate emergency responses*.
- *SISSS00127 Aqua Exercise Instruction*: The unit *SISCAQU002 Perform basic water rescues* will be replaced by the non-equivalent unit *SISCAQU020 Perform water rescues*.

As these updates involve a non-equivalent unit of competency, RTOs must ensure they have the replacement units on their scope prior to transitioning to the new skill sets.

HumanAbility is a Jobs and Skills Council funded by the Australian Government Department of Employment and Workplace Relations.

What happens if I do not have the new unit on my scope?

RTOs that do not already have *SISXEMR004 Coordinate emergency responses* or *SISCAQU020 Perform water rescues* as part of a qualification on their scope will not be eligible to deliver the new skill set. These RTOs will need to add the required units to their scope before they can deliver the new skill sets.

Can I continue enrolling students in the superseded skill set during the 12-month transition period?

Yes. The 12-month transition period begins once the new skill sets are released on the National Register. RTOs can continue to enrol students during the transition period. However, all students must either complete the superseded skill set or be transitioned to the new skill sets by the 12-month transition end date.
